

EWALLET MONERO

THE **WALLET** THAT PAYS!

WELCOME TO MONERO

WHAT IS MONERO?

Monero [XMR] is a brand new uprising crypto currency which originates from Bit monero.

Being the fork of Bytecoin, Monero (XMR) is an anonymous and decentralized cryptocurrency with CryptoNight (64-bit CPU-only) PoW hash algorithm and based on CryptoNote protocol.

PRESENTATION PLAN

- **Who We Are?**
- **What's Our Business Plan for 2018**
- **Our Company Vision & Mission**
- **Our Unique Services**
- **Our History 2014 to ...**
- **Our Clients and References**

WHO WE ARE ?

Monero Investment is a company that was established on the 12th of May, 2014, in New York. It is the first and only public reporting company offering a portfolio of digital assets, technologies, and consulting services to the blockchain and cryptocurrency markets.

The company is the trusted advisor and source shepherding the industry by partnering with financial institutions, and individuals around the world.

We are the experts in information security, and we're here to meet the toughest requirements. Our years of experience and solid professional knowledge sets us apart from the rest.

E-WALLET **MONERO**

WHO WE ARE ?

The rise of Bitcoin and other cryptocurrencies has forced us to rethink what money is and what it can be.

In July 2017, The Monero and The Monero investment united. It was our first partnership. Monero is based on the CryptoNote protocol and possesses significant algorithmic differences relating to blockchain obfuscation.

We are also glad to say that on August 15, 2017, we created the new payment system where you can have control over your money. We look forward to making our first public presentation at Ewallet Monero.

OUR MISSION

We believe in a future where trusted financial service providers will be replaced by software and consumer devices. Our mission is to give users powerful new capabilities and 100% control over their own money. Ewallet Monero is building the products to do just that.

We want to develop the world's best payment system for blockchain and other cryptographic technologies and business

OUR VISION

Many blockchain companies do proofs-of-concept. Ewallet Monero moves beyond proof-of-concept into design, development, and delivery of real-world applications.

We approach private blockchain construction in pursuit of the same end goal that has guided our work on public blockchains: making digital currencies function as mature systems with enterprise-scale tools.

OUR
SERVICES

OUR UNIQUE SERVICES

Monero's blockchain architecture demonstrates immunity to hacking risks. The blockchain is not an interconnected series of individual accounts, but keep record of past transactions.

UNTRACEABLE

Unlike most of the digital coins, Monero uses a special technology called "ring signatures" that shuffles users' public keys to eliminate the possibility to identify a particular user.

UNLINKABLE

Being a great feature, untraceability doesn't protect a receiver from defining his or her balance through inspecting ingoing messages to the user's public address. Therefore, Monero employs a specific protocol which generates multiple unique one-time addresses that can only be linked by the payment receiver and are unfeasible to be revealed through blockchain analysis..

SECURE

Like any other digital currency, Monero is cryptographically secured. Though, the peculiarity of algorithm consists in tremendous computational and electric capabilities that a hacker would need to even try to steal your funds. To put it in a nutshell, your wallet is unbreakable.

PRIVATE

Besides other features, privacy is basically provided with the idea of anonymous transactions without any obligations to cooperate with third parties. Monero is based on cryptography that has lots of muddling factors in its arsenal, making it difficult to detect whom transactions belong to.

MONERO HISTORY

APRIL/MAY 2014

CORE TEAM

The 7 people you know today as the Monero Core Team didn't know each other, and came together by chance when they took Monero over from thankful for today.

JUNE 2014

MNEMONICS

Inspired by Electrum's mnemonic seed, Monero added mnemonic seeds early on in development. This is fundamental to having easily-secured wallets.

JULY/AUGUST 2014

ATTACKED

Sophisticated attackers with the intimate knowledge of the Monero codebase launch two attacks against Monero, the second causing a 30-minute network fork. Both attacks are thwarted with quick patches.

MONERO HISTORY

NOVEMBER/DECEMBER 2014

CHEAPER FEES

In order to reduce the transaction fees to a usable level, Monero added per-transaction fees, making transactions significantly cheaper!

SEPTEMBER 2014

OPENALIAS

In line with the stated Monero goal of creating something that is both useful and usable, the OpenAlias standard is introduced. Long complex addresses are reduced to simplicity

AUGUST 2017
E-WALLET MONERO STARTS

We are glad to say that on August 15, 2017, we created the new payment system where you have more control over your money. We look forward to making our first public presentation at Ewallet Monero.

**"HAVE YOU EVER THOUGHT ABOUT WHAT
IT WOULD BE LIKE ,OWN YOUR LIFE ?"**

**"E-wallet Monero gives you the opportunity to invest in cryptocurrency and get bonuses from
your references"**

DAILY INTEREST

MONERO INVESTMENT wants to present ewalletmonero.org all around the world as a fast and safe payment system with the power of Blockchain and Monero. E-wallet Monero aims to expand the usage of the wallet globally by providing a daily interest reward and a special referral program.

Ewallet Monero assures you that you will receive 0.85% daily interest on your deposit as long as you use the wallet for the limited project time of 3 years.

Ewalletmonero.org is a wallet of Monero coin and its payment system. ewalletmonero.org also enables you to buy & sell Monero. Users can get benefit from the daily interest rewards and referral bonuses as long as they hold their Monero in their wallets.

BINARY MLM ORGANIZATION PLAN

Your matching bonuses are reflected every day depending on the deposit of the weaker branch of your organization.

Users will continue to earn matching bonuses as long as the project runs.

Example:

- 1) Which branch is weaker (LEFT)
- 2) How much total XMR is held at that branch (100 XMR)
- 3) What is your matching bonus percentage (%6)
- 4) What is your matching bonus this week (6 XMR).
